

The white blinds lift and lower from the base manually. Turn the handle on the left to angle the direction of the blind. Windows and doors: IMPORTANT, always use the metal stays to keep these either open or closed. Otherwise we may end up with broken glass that neither of us want. Thanks so much.

Before you leave;
Clean the bench with the spray provided. Put all dirty dishes in the bowl underneath the bench. Put general rubbish in the bin. Leave glass, tin and plastic recycling on the kitchen bench. Take all of your leftover food with you.

We can't wait to see you again. If you have enjoyed your stay please tell others. If you think we could improve please let us know.

CHECK OUT 11AM

Late check out 12noon -
extra \$20 by arrangement

Couples Retreat

We want you to have a great stay here at the Couples Retreat Wellbeing Area. We appreciate you reading this pamphlet.

The Basics

Please look after our area. We have tried to think of everything that you may need to keep your stay comfortable. If you think we have forgotten something or have an idea for the future we're all ears!

Any issues email or text Vanessa

Please call at the Homestead if you have an urgent requirement.

How things work;

The shower

The shower is heated by gas. You should be able to simply flip the switch on the shower head and water will come out. You shouldn't need to touch the other controls but if you like it colder or hotter you may alter the temperature to suit yourself.

The toilet

The toilet is eco friendly and is composting! It does not flush. Instead, after you have done your business looking at that beautiful view, you simply top up the bucket with more shavings and coconut coir from the white bucket. This keeps the odours down and absorbs moisture.

The Spa

The hot tub turns on automatically at 8am and turns off at 3pm. It self cleans during this time so please don't interfere with the controls on the front. The temperature is set at 38 degrees celsius, it may change slightly due to the ambient temperature.
